

THE NEW CV-5000 PROFESSIONAL 3-RU POWER AMPLIFIER FROM CERWIN-VEGA! IS A MASTERPIECE COMBINATION OF RAW POWER AND HIGH-DEFINITION SOUND

The new CV-5000 pro power amp expands Cerwin-Vega's highly successful CV series of professional amplifiers by taking its power capabilities to new heights – up to 2,500 Watts in stereo mode operation and up to 5,000 Watts in bridged mono mode

And the new CV-5000 brings with it Cerwin-Vega!'s other famous combination: high-performance sound at an outstanding value

DEERFIELD BEACH, FL, July 20,, 2010 – Cerwin-Vega!, one of the world's leading manufacturers of loudspeakers and audio products for professional and home markets, has raised the roof on its acclaimed CV Series of power amplifiers with the introduction of the new CV-5000 3-RU Professional Power Amplifier. This field proven amp design is the most muscular yet in the CV Series, offering up to 2,500 Watts in 2-Ohm stereo mode operation and up to 5,000 Watts in 4-Ohm bridged mono mode. The CV-5000 is powerful, yet feature-laden, with a design that includes a high-efficiency, variable-speed fan tunnel cooling system to ensure reliable, cool running operation; 21-position detent level control knobs for each channel assuring easily repeatable settings; signal and clip indicators for convenient monitoring of the amplifier's status; a defeatable high-pass filter and limiter for each channel; electronically balanced combo jack and XLR inputs and 5-way binding post & Speakon[®] output connectors for each channel; and the right connectors for integration into most any environment. This much power requires sophisticated circuit protection and the CV-5000 has it, with an electronics design that delivers clean, reliable performance with protection circuitry that guards against thermal overloads, short circuits, DC voltage, subsonic frequencies, and current overdriving.

The CV-5000 joins Cerwin-Vega!'s highly successful CV line of professional power amplifiers, including the CV-900, CV-1800, and CV-2800, and shares with them the CV Series' robust design characteristics -- these rugged, workhorses have the muscle to accommodate the most demanding audio challenges. With a hi-tech esthetic that looks great in any equipment rack environment, the Cerwin Vega! CV Series power amplifiers offer a clean, inviting presence combined with simple user controls, such as 6-segment, multi-color LED ladders for visual monitoring of signal status per channel. Tim Dorwart, Cerwin-Vega CEO, states, "The new CV-5000 professional power amplifier

extends the reach of our well-received CV Series line of power amplifiers and reflects Cerwin-Vega's dedication to offering our users the right tools for every application.”
