

“XLS” MARKS THE SPOT – THE NEW XLS SERIES OF HOME SPEAKERS FROM CERWIN-VEGA! BUILDS ON ENGINEERING PROWESS AND A PASSION FOR SOUND REPRODUCTION TO ELEVATE HOME AUDIO TO NEW LEVELS.

-Eight products in the new XLS Home Speaker Series deliver bigger sound while improving clarity and accuracy.

Deerfield Beach, FL – November 19, 2009 – Cerwin-Vega!, one of the world’s leading manufacturers of loudspeakers and audio products for professional and home markets, today announced the introduction of the new XLS Home Speaker Series. Building on the engineering and market success of the Cerwin-Vega! CLS series of loudspeakers, the new XLS Series takes residential sound system performance to a completely new level. Utilizing refinements to the design and engineering of the CLS range including upgraded drivers, horns and baffles, the eight products in the new XLS Series deliver additional power handling capacity, improved articulation and intelligibility, and world-class low-frequency performance.

Home theater and sound system enthusiasts will discover that the Cerwin-Vega! XLS Series offers a greater range of solutions for any project. Those familiar with the successful CLS Series will find the new XLS Series goes a giant step further, offering an array of engineering enhancements. Stereo imaging is greatly improved thanks to optimized high- and mid-frequency waveguide shapes placement, giving the XLS better on and off axis response, smoother response at the crossover regions, and greater control of the overall dispersion. Extensive new internal bracing and newly optimized port dimensions and placement have drastically reduced enclosure resonances and port noise. Intelligibility and overall voicing have been vastly improved by these new engineering refinements as well as by the optimization of the speakers’ crossovers, while still retaining Cerwin-Vega!’s classic punch and thunder on the low end. The new XLS Series is also easy on the eye: classic Cerwin-Vega! red surround bands encircle the midrange drivers, offering a racy look when the grills are off, and the new XLS-28 Dual 8” slim tower offers a décor-friendly speaker for smaller spaces.

The new XLS Home Speaker Series lineup consists of the following models:

- XLS-215 – Dual 15” woofers in a 3-way design
- XLS-15 – Single 15” woofer in a 3-way design
- XLS-12 – Single 12” woofer in a 3-way design
- XLS-28 – Dual 8” woofers in a sleek tower, 3-way design
- XLS-6C – Dual 6.5” 2-way center channel speaker
- XLS-6 – Single 6.5” 2-way bookshelf speaker
- XLS-15S - Single 15” powered subwoofer
- XLS-12S - Single 12” powered subwoofer

The Cerwin-Vega! XLS Home Speaker Series speakers play loud and look proud at a very cost-effective price point.

About Cerwin-Vega!

A member of the Stanton Group of companies, Cerwin-Vega!, Inc. is a leader in the design, manufacture, and distribution of loudspeakers for the home, mobile, and professional audio markets.
